

An aerial photograph showing a wide river with a bridge crossing it. The surrounding land is heavily flooded, with water reaching the roofs of several houses and covering large areas of forest. The water is a muddy brown color, contrasting with the green of the trees. The bridge is a simple structure with a railing, and the houses are scattered across the flooded landscape.

Operational Period:

Starting: 08:00 / 25 Aug 16

Ending: 08:00 / 26 Aug 16

Single Point of Contact (SPOC)	225-219-3640
Hotline Numbers	
DEQ	888-763-5424
EPA	866-EPA-SPIL
NRC	800-424-8802
Louisiana State Police (LSP)	225-925-6595

1. Incident Name	2. Operational Period	Date / Time	INCIDENT OBJECTIVES ICS 202
2016 August Flood	From: 08/25/2016 / 08:00 To: 08/26/2016 / 08:00		
3. Incident Objective(s)			
1. Ensure health and safety of responders and the public by conducting operations in accordance with the approved site safety plan. 2. Monitor debris activities at landfills 3. Continue to respond to complaints/concerns from citizens			
4. Operational Period Command Emphasis (Priorities, Key Decisions for Operational Period)			
1. Complete detailed 214s as required, but it is not necessary to submit them to IC at the end of every day. 2. Develop plan for appropriate ICP staff; evaluate and provide appropriate "right sizing" of the organization to correlate with operational needs. 3. Reaching out to FEMA/ EPA for assistance with household hazardous waste, white goods, and orphan containers. 4. Do not put any photographs of flooding and damage on <u>ANY</u> type of social media. 5. The Incident Command main phone number is (225) 219-1221			
5. Weather Forecast			
Baton Rouge Area: Thursday, August 25 - 60% chance of scattered thunderstorms High temp 88 Friday, August 26 - Mostly sunny, 10% chance of rain High temp 91			
6. Safety Objectives			
1. Staph infections – due to recent outbreak of severe bacterial infections, all persistent rashes and/or swelling around cuts/abrasions must be reported to the Site Safety Officer. 2. Driving – Be aware of when driving since contractors are coming here to work from other states that are not familiar with Louisiana area roadways. Also be aware that in many areas, red lights are not functioning. Please use appropriate caution when approaching an intersection where this is the case. 3. Road Hazards - Trucks are loaded with debris and may not have the appropriate covering to prevent falling out during transport. Be alert, keep your distances, follow the laws, and drive safely. 4. Debris Hazards - Use a tool first when disturbing debris or overturning containers, and never use your hands. If needed, wear snake chaps during any operation with the potential to encounter snakes. If bitten or stung, seek medical assistance immediately, even if you're certain it wasn't a poisonous species. 5. Reporting Injuries – it is very crucial to report all injuries to your Supervisor or Safety Officer.

8. Work Assignments							
Access sewage treatment plant in impacted parishes. Facilities are listed in the Waste Water modules. Complete RM entries per guidance documents and submit for QA review to Branch QA Coordinator.							
9. Special Instructions							
Minimum Level D PPE as needed, ear plugs, hard hats for overhead hazards, steel-toed shoes, and work gloves (nitrile duty gloves, leather gloves). Beware of floodwaters, slips, trips, falls, unknown materials within debris, security, handling of unknown chemicals, and the movement of containers. It is recommended that insole inserts be used while performing operations in debris fields to prevent foot injuries.

IAP SAFETY ANALYSIS

ICS 215a

The Department is transitioning from search & rescue mode to recovery. During the current operational period the focus will be on Rapid Needs Assessment (RNA), water reconnaissance, and telephone notifications. Personal operating in the field should be aware of ongoing high water risks in many areas. Also, the potential exists for contact with dangerous wildlife (poisonous snakes, alligators, fire ants, etc.) Typical afternoon thunderstorms have the potential for frequent cloud to ground lighting, seek shelter with approaching storms. All staff has Stop Work Authority if the work situation presents unnecessary or undue hazards. As always, report all injuries to the Safety Officer, then clean and disinfect as soon as possible. Be aware of any heavy equipment operating in your immediate vicinity and be sure that heavy equipment operators are aware of your presence by waving and wearing high visibility vests. Tetanus immunizations need to be up to date for all field inspectors. Please contact Annette Sharp for more information. If you come into contact with any barrels that are bulging at the ends or are hissing or whistling because of a pressure release, DO NOT touch them, and immediately evacuate to a safe distance.

Safety Message

2016 August Flood

Operational Period: 08/25/2016/ 0800
08/26/2016 / 0800

Major Hazards and Risk:

Defensive Driving, Road Washouts, Debris/Sampling, Electrical hazards, Security, Fatigue, PPE, Heat, Animals

Tetanus Immunization – Inspectors going out into the field should be up to date on their tetanus immunizations. If you are unsure of when you had your last tetanus shot, please contact Annette Sharpe. She can verify the date of immunization, and if you need to be immunized, she can provide you with information specific to your region on who to contact and where to go.

Heavy Equipment Awareness – Please be aware of any heavy equipment working in your vicinity. Be aware of the equipment's range of movement and any reverse warning sirens. Please stand clear of any equipment in use.

High Visibility Vests – All field inspectors are reminded to wear high visibility colored vests with reflective components during inspections.

Defensive Driving - Be alert. Drive with extreme caution. "Watch out for couple of things: 1) twisted or bent stop signs and then other drivers miss seeing the downed signs at intersections; 2) debris on the road like leaning electrical poles and downed power lines. Be aware of service people working in the parishes while driving roads and highways. Be aware of road grade stability that was affected by flooding and roadway washouts.

Debris/ Sampling: Wear Appropriate PPE to address the hazard issues while entering and exiting debris fields. Be aware of hollow spaces in debris fields. Remember you can get lacerations from tree trimming. Be aware of potential conditions for fire and explosions. If you are on landfill assessment duty, be sure to check the condition of your vehicles before you leave the facility and get back on the highway.

Fatigue: Know your limitations. Watch your buddy. He/She are just as busy as you are. Accidents happen when personnel are fatigued and their thoughts processes are muddled. Physical and mental reaction times become slower. When you are tired and rushing to finish a job, is when a lot of trips, slips, and falls occur. With a loss of power to a lot of homes, people are doing without sleep. Are you one of them?

PPE: Personal protective equipment is the first line of defense against injury or potential exposures. All field work requires the minimum of Level D protection.

Wild Animals – Please beware that wild animals and insects are being displaced by raising flood waters. These animals are seeking new homes and food. So be aware of snakes, alligators, black bear, raccoon, possums, armadillos, deer, ants, and other stinging insects.

Mosquitoes: WEAR INSECT REPELLANT.

Hydrate/Heat: Remember to drink plenty of fluids. Bring something to drink since many facilities have suffered damage and are not open or are without power at this time. Apply sunscreen to exposed skin during prolonged outdoor activities.

Weather Forecast:

Thursday August 25: Scattered thunderstorms. High 88F. Winds E at 5 to 10 mph. Chance of rain 60%.

Friday August 26: Except for a few afternoon clouds, mainly sunny. High 91F. Winds ENE at 5 to 10 mph

There are some parishes still experiencing flooding from this event. Please be aware of driving conditions for yourself and the other driver who could hit you if they missed seeing the downed or twisted STOP sign at that intersection. You could be totally right and have the right away and still end up in the hospital. So, protect yourself and those riding with you.

Do not drive cars through flooded areas. Remember....Two feet of rushing water can carry away most vehicles including trucks/pickups. Turn around and don't drown.

Tommy Doran
LDEQ Safety Officer
